Job Description

- You'll work in a flexible and dynamic team that's starting something new.
- You'll be involved in the creative process; your input is vital to us.
- Together with the team, you'll transform shared ideas into code.

What You Bring

- Bachelor's degree, or above, in a STEM subject.
- A project you've developed or co-developed. Show it to us and explain it to us through its code. It must be written in JavaScript or TypeScript; if it uses React, that is a bonus.
- Experience with configuring, implementing, and managing infrastructure as code practices to ensure consistent and scalable deployment environments for our cloud infrastructure on AWS.
- Knowledge of how you use ChatGPT or Copilot, ensuring you can ask the right coding questions to get the optimal answer.
- Malao's strong value set of truth, justice, courage, gratitude and joy, demonstrating integrity and a willingness to collaborate with others, and enthusiasm for personal and professional growth in an environment encouraging open communication and candour.

What We Offer

- A project that encompasses all aspects of modern AI - whether text, images, sound, or video - and game engine technology.
- The flexibility to arrange your working hours as it suits you; for us, only the results matter.
- The flexibility to work from home as well as from our central Munich office in vibrant Haidhausen.
- A competitive salary package that reflects your skills, qualifications, and experience. Additionally, we are currently considering an employee share scheme for our employees.
- The support for your professional and personal growth through individual and group touchpoints and funding for relevant trips, conferences and courses.

How to Apply

Please apply filling out the following questions and uploading your CV. It should take you around 10-15 minutes: <https://malao.typeform.com/workatmalao>.
